※Applicants who are considering applying to the Department of Architecture and Building Engineering are requested to review this note together with the application guidelines.
Please note that this document does not alter the content of the application guidelines or the examination format; rather, it is intended to clarify the intent of the stated provisions.

Important Notes to Department of Architecture and Building Engineering Applicants (Entrance Examination for Academic Year 2027 Admission)

1. About Specialized Subjects (1)
Ten questions will be included in the Specialized Subjects (1) exam. They will consist of two questions from each of the ten areas in the five groups shown in the table below.

Group	Areas
A1	Structural Mechanics, Structural Engineering *
B1	Building Materials Science, Building Construction
C1	Building Environmental Studies, Building Environmental Systems
D1	Architectural Planning, Urban Planning
E1	Architectural History, Architectural Design

* Questions will be limited to steel, reinforced concrete, and wood construction as well as vibrational studies.

2. About Specialized Subjects (2)
For your Specialized Subjects (2) exam, you may choose Architectural Design or one group shown in the table below

(Note) The table below shows the examination fields corresponding to each group. For groups in which the examination field is indicated by multiple keywords, the entire set of keywords constitutes a single examination field. (Select either 'Architectural Design' or one group from 'A2', 'B2', 'C2', 'D2', or 'E2' in the table below.)

Group	Areas
A2	Structural Mechanics, Structural Engineering*
B2	Building Materials Science, Building Construction
C2	Building Environmental Studies, Building Environmental Systems
D2	Architectural Planning, Urban Planning
E2	Architectural History

* Questions will be limited to steel, reinforced concrete, and wood construction as well as vibrational studies.

The Architectural Design exam subject will include an oral exam based on your portfolio, so please bring your portfolio to the exam. Portfolios should be about twenty pages (with no more than two joint projects, both of which should be clearly marked as such) in an A2-size clear file folder.

3. About Research Plan Forms
You must submit a research plan form along with your application to the Department of Architecture and Building Engineering (Use the form prescribed by the graduate school).
(1) In the "Specialized Subjects (2)" section, mark the box for either "Architectural Design" or one group from A2 to E2 with a circle after consulting with your desired supervisor(s). You cannot change this after you submit your application.
(2) In the "Research Plan" section, please detail the topic(s) you wish to research in the master's program as well as the methods you intend to use. You may use any format. Be sure to contact and consult with your desired supervisor in depth before writing your research plan. However, the supervisor cannot be involved in the creation of the research plan.

The content of your research plan will be reviewed during the interview. Depending on its content, we may not be able to accept your plan.

You may write your research plan using word-processing software. You may also submit photocopies, as long as you have copied both sides of the form onto one page. However, you may not attach any other materials, including in the area designated for writing the research plan.

4. Other Notes
Regarding admission quota: In principle, a single supervisor may take on up to five students.
